WOW-COMPARE

# WOW-COMPARE

- ▶ Login: [francois1.guergadic@epitech.eu](mailto:francois1.guergadic@epitech.eu)
- ▶ Stack: React.js, Redux
- ▶ Competition: None
- ▶ Summary: Goal is to create a "super easy to use" tools for World of Warcraft player group making.

# WOW-COMPARE

- ▶ World of warcraft being a huge MMO game, making a group with other players to go through game content can be rude due to skill difference between players. While some website are giving some accurate informations about a specific players, it become easier to know if the player that we want to invite is the one we are looking for.
- ▶ The main idea behind wow-compare is to have a tool where we can see in only one place regrouped informations about a bunch of players using API from the other website (warcraftlogs.com and [raider.io](https://raider.io)).

# WOW-COMPARE

- ▶ Main stack: React.js, Redux
- ▶ Other Restrictions:
  - ▶ Linter Airbnb
  - ▶ Continuous Integration: Staging and Production Mode
  - ▶ Analytics
